Continuing Basque Riots Posing Crisis for Madrid

From Wire Dispatches

MADRID, July 12 — Interior

Minister Rodolfo Martin Villa today went to northern Spain for talks with public officials to try and restore peace in the restive Basque

Interior Minister at Scene

His visit was made in the middle of nearly round-the-clock clashes between demonstrators and police that led many Basques to term the situation as "pre-civil war."

For the government in Madrid, it is one of the worst crises since Spain began to move toward democracy after the death of Franco in 1975. Most political parties in Spain have blamed Mr. Martin Villa for the situation and have asked for his resignation.

The recent violence began in Pamplona, where thousands of tourists had flocked for annual "running of the bulls" during the San Fermin fiesta. Oo Saturday, rightists and Basque autocomists clashed in the builring prompting the police to hurl smoke grenades and fire rubber bullets. A 23-yearold man was killed and more than 130 were injured to the 10 hours of rioting that followed.

The rioting then spread to San Sehastian, where a 19-year-old

U.S. Seeks Rule To Cut Risk of Grain Blasts

WASHINGTON, July 12 (NYT) - The grain industry yesterday was put on notice that the Agriculture Department would move toward banning the recirculation of graio dust, a practice suspected of causing explosions that pose a con-stant threat to grain workers and

The dust, which rises in potentially explosive clouds whenever large volumes of grain are handled is frequently captured and returned to the grain flow to avoid loss of

weight.
To reduce the amount of dust suspended in the air and on surfaces in elevators is to reduce the risk of explosion, and we must now begin to move in this direction in the hope that recirculation of dust in elevator systems can eventually be eliminated," P.R. Smith, assistant secretary of agriculture for market services, said in announcing the decision to a symposium at the Na-tional Academy of Sciences Audi-

Arms Talks Are Opened

(Continued from Page 1) not only with Shcharansky but all going to be pushed around this the dissidents."

The U.S. arms proposal is a at providing a breakthrough in the treaty talks, which seek to limit new missiles and long-range strategie bombers on both sides.

The U.S. plan would restrict the missile modifications the Soviet Union could make during the life of the treaty, until 1985.

Uoder the plan, the United States would also reserve the right to develop the MX, a mobilo missile system, and also to build thousands of new silos to make the current arsenal of Minuteman missiles less vulnerable by shifting them periodically from silo to silo.

"It's going to be hard sledding," a senior U.S. official said in anticipation of Soviet objections to the "shell game" defense strategy known to officials as MAP, or Multiple Aiming Points.

The source also said the Carter administration had made no definite decision regarding production of the MX mobile missile system. The Soviet Union suggested in a meeting last spring that all new missile systems should be banned until 1985. But the United States rejected the proposal because it would preclude testing the MX.

Areas of Concern

U.S. concern over the growing Soviet missile power is one of the main obstacles to completion of an The administration decided not arms treaty. Another major stum-hling block is the Soviet Backfire bomber, which the United States to postpone this week's SALT ocgotiations between Secretary of State Cyrus Vance and Andrei cootends is a strategic weapon, the production and deployment of which should be limited. Dole said. Questioned later, Sen. Dole said

For Buying Computers

The Russians used this kind of classification when they wanted to buy advanced equipment like computers from Western Europe and the United States — technology that Western governments would not sell to anything but "open"

For example, Jews who worked on three "oceanographic research vessels" ostensibly manned by scientists searching for knowledge, had been denied permission to emigrate on the grounds that they "learned their secrets at their for-mer work places." This might suggest that the research vessels were actually spy ships.

My other scientific stories from Moscow that have been cited in the trial dealt with sociology, genetic engineering, space flights, and parapsychology. I am accused of worming out information that is not subject to publication in the open [Soviet] press," a Soviet court official said.

My article on sociology described unrest in the Soviet Sociological Institute because of ideological restraints on questions to be asked in public-opinion polls. Only politically tailored questions could be asked lest oon-Markist replies came back.

Mr. Shcharansky and 1 had talked about sociology, much as he did with other Western correspondents to whom he offered his help help intended to make correspond-Shcharansky wanted to promote.

He mentioned a dissident social historian named Zinoviev, who had already published a book in the West, and he arranged — openly, on the telephone — that we visit him, which we did. There was nothing elandestine about it, and nothing "secret" came out of it. On genetic engineering, I inter-

viewed a top Soviet geneticist, V.

Englehardt, on the subject of splicing genes to make new life species. aged and much-respected scientist, he asked that I submit my story for his approval before publication. Departing from usual practice, I did show him the article, to

which he strongly objected.

He had expected it to be in question-and-answer form, not part of a newspaper story, and he refused to approve it. I tore up the story and wrote another using information not obtained from him.

Translated Article

Most help came from E. Trifonov, who had been refused an exit visa but who has now emigrated. This help consisted of translat-ing a technical article from a Soviet scientific journal. (The cost of his work was entered on my expense account.) Mr. Shcharansky knew of my project but, so far as I recall, be provided no information.

Mr. Trifonov, in fact, suggested just before his departure that I meet a friend of his, Valeri Petukhov, who was interested in parapsychology (as a sideline to his main job in pharmaceuticals). Mr. Petu-khov made contact with me first through Mr. Shcharansky and then directly. A year ago, on the Moscow street, he gave me the article that precipitated my seizure by

He was part of a trap, it now seems certain. Dissident sources as well as Western diplomats later reported that he was "commended" by the Communist Party branch of his drug institute for "unmasking" me as a spy. So whatever "secrets" may be hidden in extrasensory perception were, in all likelihood, never available for "worming out"

In space activities, not all my re-porting involved Mr. Shcharansky. I had applied for an interview with a cosmonaut during the Apollo-Soyuz flight, for example. It never came through. All questions about space that I asked of a psychologist named E. Axelrod, at a meeting he arranged with me through Mr. Sheharansky, got no useful responses. It turned out be knew almost nothing about space and so l did not write a story about it.

So there was no secret informa-tion provided to me by Mr. Shcharansky, and even under Soviet rules of what is secret information - traffic statistics, salaries of athletes, all information not officially released - there is oo basis in my experience with him to support conviction for espiooage. O Los Angeles Times

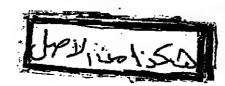

Police Battle 50 At Belfast Event

BELFAST, July 12 (AP) - Policemen battled more than 50 youths today as Northern Ireland's million Protestants celebrated their forebears' victory over Roman Catholic rivals at the battle of the Boyne in 1690.

Police headquarters said five officers were injured when the youths, many of them drunk, bombarded them with bottles and bricks in Belfast's Carlisle Circus quarter. Two youths were arrested on assault charges.

Police reported the clash was the only incident to mar "The Twelfth" as more than 100,000 Orangemen. members of a powerful Protestant organization, took part in 40 major parades and rallies.

House Unit Votes to Limit Federal Pay of Retirees

By Kathy Sawyer

 A House committee yesterday passed an amendment to President Carter's civil service revision bill that would limit the income of future military retrees who become civilian employees of the federal government — so-called "double

The amendment will not affect those who already are earning federal pay on top of their military pensions, nor will it affect those disabled in combat, Rep. Patricia Schroeder, D.-Colo., said when she introduced the amendment.

As of a year ago there were 34 retired generals whose combined federal paychecks and pensions averaged \$83,293 in annual income. an additional 16 getting more than

WASHINGTON, July 12 (WP) \$81,000 and 60 getting an average \$48,569 annually, according to a congressional study cited by Rep. Schroeder.

For future retirees, the amendment would limit the total federal income to the top salary in effect currently \$47,000. It would not affect most lower-ranking retirees who get civil service jobs, according to a Schroeder aide.

The amendment does not apply to certain high-ranking federal law enforcement officials who, under a District of Columbia retirement provision, get full pensions on top of civil service pay, the aide noted. Their pensions are tax-free, an advantage that even disabled military retirees do not get, be noted.

EYE TO EYE ON ART - Joan Mondale, the vice president's wife, talks to sculptor Mark di Suvero outside the Hirshhorn Museum and Sculpture Garden in Washington, where Mr. di Suvero is building a sculpture from scrap steel. The piece was commissioned by the Institute of Scrap Iron and Steel Inc. as a gesture of "gratitude to America and its people for the opportunity given to the countless immigrants who began the scrap industry in this country." The sculpture may incorporate such items as a locomotive cab and bow of a ship.

Bank Reforms Passed by House Panel

By George Lardner Jr.

WASHINGTON, July 12 (WP) With its sponsor happily voicing acknowledgements to Bert Lance, the House Banking Committee gave final approval yesterday to the most far-reaching bank reform leg-islation in more than a decade.

The committee unanimously agreed 10 send the bill to the floor ter adding some sharply contested provisions that would restrict the government's unfettered access to individual bank records.

Rep. Fernand St Germain, D-R.I., hailed the bill as "a major victory" for the public and said it would, if properly carried out. bring an end to a wide array of banking abuses, including the freewheeling practices that made headlines last year in the Lance

Mr. Lance resigned last September as President Carter's budget director as the result of revelations concerning his financial dealings.

"We have provided the regulato-

mercial banks are not operated as playpens for insiders, and that they meet the obligations of their charters to provide services to the public," Rep. St Germain, the bill's principal author, said in a state-

The wide-ranging measure, which includes 20 separate titles, would prohibit overdrafts by bank insiders, broaden the power of government regulators to issue ceaseand-desist orders, and impose uniform limits on loans by a bank to insiders, their businesses and politi-

cal campaigns.

Chance to Challenge

Overriding Justice Department protests, the committee also voted to prevent government agencies from exchanging financial data without giving the person involved a chance to challenge the transfer. What we're talking about here

is the witch-hunt," Rep. Stewart McKinney, R-Conn., protested. Under current law, he complained, the Internal Revenue Service could send financial data to the FBI. ry machinery to assure that com- which could send it to the Securi-

ties and Exchange Commission and all over Washington in search for transgressions far beyond the jurisdiction of the agency that first obtained the records.

Rep. Frank Annunzio, D-III., suggested that a vote for Rep. McKinney's amendment amounted to "being soft on crime." Rep. McKinney shot back; "What we've heen soft on is the executive hranch's running through the rights of American citizens.

Rep. William Moorhead, D.-Pa., agreed, "Once a transfer has taken place, there's no way to undo it." he said, "Copies can be made. The damage has been done."

The committee voted 32-9 to adopt Rep. McKinney's amendment, then approved a limitation offered by Rep. John Rousselot, R-Calif., who estimated that 160 U.S. agencies could avoid the prior-notice rule. He moved to exempt only the SEC, and only because "they've lobbied this committee so damn

A Covey of Coups

When regimes in several distant lands are toppled within a matter of days, there is a temptation to impose connections for the sake of symmetry. The result is usually more a tribute to imagination than to reality. In looking at the recent upbeavals in Yemen, Ghana and Mauritania, we do better to try to understand what seems to be happening. That is chore enough, but it is the prelude to policy in small matters as in great.

It would take a bold novelist to fabricate as bizarre a series of events as the recent political convulsions in the nations of Yemen and Southern Yemen. The president of Yemen was killed as he received from Southern Yemen's president an envoy carrying a dispatch case containing a bomb instead of the promised diplomatic note. The president of Southern Yemen apparently followed up with a coup to pre-empt a coup. He lost and was executed, probably taking to the grave. the truth about the mysterious murder in the other Yemen.

This web of plotting and counterplotting is of some importance to the rest of the world because of the strategic location of the two Yemens. Both overlook the strait at the southern end of the Red Sea. Both border a politically nervous Saudi Arabia. And radical Southern Yemen, allied with the Soviet Union both before and after the coup. has provided the Russians with staging bases for their operations in the Horn of Africa and once sponsored an unsuccessul rebellion against the sultan of neighboring Oman.

The coup seems, at this point, unlikely to

affect the strategic balance. The Saudis are well equipped to defend themselves and their allies, and the Southern Yemenis are no more likely to move against the strait than they were before. Of greater significance would be a reconciliation between Southern Yemen and its more conservative Arab neighbors. Fiscal and military reality argues strongly for Soutbern Yemen to follow such a path of pragmatism. The fact that Salim Robaya Ali, the deposed Southern Yemeni president, supported reconciliation does not necessarily mean that his deposers may not ultimately follow the same course.

A succession of governments has failed to fulfill the high hopes that Kwame Nkrumah raised for Ghana when it became one of the first European colonies in Africa to gain its

independence. The economy remains dependent — too dependent — on a single crop, cocoa, as it was during the time of British administration. Gen. Ignatius Kutu Acheampong was forced out last week after he had tried to tackle an accumulation of both social and economic problems, as earnestly as any of his predecessors.

But in recent months a growing discontent was met with growing repression until finally other soldiers pushed the exhausted leadership aside. The release by the new government of the political prisoners it inherited is an encouraging sign that the repression, at least, is over. Now perhaps Gen. Acheampong's goal of recruiting new civilian talent for the regime may be realized. Pulling many contentious factions together will not solve Ghana's basic problems, but it is the essential first step.

One issue dominates all others in the vast, thinly populated desert country of Mauritania: its war to protect the annexation of a chunk of the former Spanish Sahara. Mauritania entered the war largely to appease Morocco and to ward off Algerian designs on the territory. It has meant trying to suppress guerrillas who aspire to independence and so far it has gained Mauritania nothing but grief. The military officers who overthrew Mauritania's long-time president, Moktar Ould Daddah, apparently intend to continue the fighting. If so, the nation will continue to bleed in a cause more Morocco's, and indirectly France's, than its own.

The war has made the country virtually a dependency of Morocco and of France. And Mauritania's small stratum of elite professionals bas been divided about it, yet the new military junta may find it impossible even to think of quitting the hattle now. Morocco would react with anger and Saudi Arabia would probably cut off the subsidy it provides as a way of containing Algerian ambi-

So the coup is unlikely to change anything, leaving a situation of double tragedy. One is for the people of the Western Sahara, who would prohably prefer independence. The second is for Mauritania itself, increasingly a pawn of other nations. As long as the war continues Mauritanians will find their most basic decisions dictated by events over which they have little control. Their new rulers have no other inberitance.

THE NEW YORK TIMES.

SALT, Despite the Trials

Secretary of State Cyrus Vance is exactly where he ought to be today: in Geneva, talking about strategic-arms control with his Soviet counterpart, Andrei Gromyko. Some Americans, including a group of senators, he-lieve he should have boycotted the Geneva session, or even suspend the Strategic Arms Limitation Talks altogether, to indicate displeasure with the current trials of Anatoli Shcharansky and Alexander Ginshurg. Yet that course would he of no practical henefit to the defendants, and it could undercut the security interests of the United States.

Mr. Vance said, hefore leaving for Geneva, that the SALT issue "affects the peace of the world" and thus "must be treated differently from others and should be addressed on a continuing basis with the highest priority." That's the point. The United States has properly canceled science and environment missions to Moscow. The Russians had a special interest in the science mission. But negotiating an arms-control treaty is in no sense a one-sided affair. It is a process promising advantage to the United States as well. We can envisage an atmosphere arising out of the trials in which Soviet harharism might reduce the Geneva talks to a thin formality and otherwise crimp the SALT process. But the United States would not thereby lose its interest in pursuing U.S. security by the armscontrol route. For Americans to imagine they can reduce the risks and costs of life in the nuclear age without some adjustment to their most dangerous adversary is an exercise in escapism.

Decent people everywhere are revolted by the trials. Responsible senators, however. have an obligation to express their revulsion in terms mindful of U.S. interests. Sen. Henry Jackson, D-Wash, says the trials raise the issue of Soviet trutworthiness. But what, to him, doesn't? Sen. Daniel P. Moynihan. D-N.Y., feels the Vance trip to Geneva makes this country an accomplice in Soviet savagery - as though the secretary of state had not made plain his own ahhorrence of the trials. Later this week he will dramatize U.S. sympathy and concern hy meeting Mrs. Shcharansky. Sen. Donald Riegel, D-Mich., can't imagine accepting any arms-control agreement negotiatied with a government that terrorizes its own people. Not even one in which the Russians accepted all U.S. demands? Would he renounce the arms-control agreement (SALT-1 and the nuclear testing han) we already have with the Russians?

People who believe arms control is a snare and who see the trials as a way to discredit what remains of detente might be excused if they said as much. But it would then be incumbent on them to make the case, to demonstrate that the United States is better off without a good SALT agreement and without some means of engaging in political dialogue with the Russians on a continuing basis. We do not think that case can be effectively made. We do not bear the shriller critics even trying to make it. That is why their protests against Mr. Vance's Geneva mission have the look of political posturing.
WASHINGTON POST.

International Opinion

Soviet Pincers on China

China is clearly taking every possible step to publicise what it regards as a threat coming from Vietnam's attitude. This does not mean that the threat is not a real one. It most certainly is. Vietnam is the strongest military State in Southeast Asia, stuffed with weapons — American and Russian. Most important, and what must worry China more than

anything, the Hanoi leadership has now opted for complete identification with the Soviet bloc. This was proved beyond doubt by last week's election of Vietnam to full membership of Comecon, the Russian-dominated trading organisation. The only other non-European members are Cuba and Mongolia. Russia now has China in her sights from

both north and south. -From the Daily Telegraph (London).

In the International Edition

Seventy-Five Years Ago July 13, 1903

WASHINGTON - The Department of Agriculture will start a new series of "poison-eating" experiments here, this time with tobacco, it was announced here yesterday. The smokers squad will start with three cigars a day, working up to the average daily consumption of a very heavy smoker, and then repeat the process with cigarettes, then pipes, and finally chewing tobacco. The smokers will abstain from smoking for a month prior to the tests and will be examined afterwards for symptoms of any ill effects.

July 13, 1928

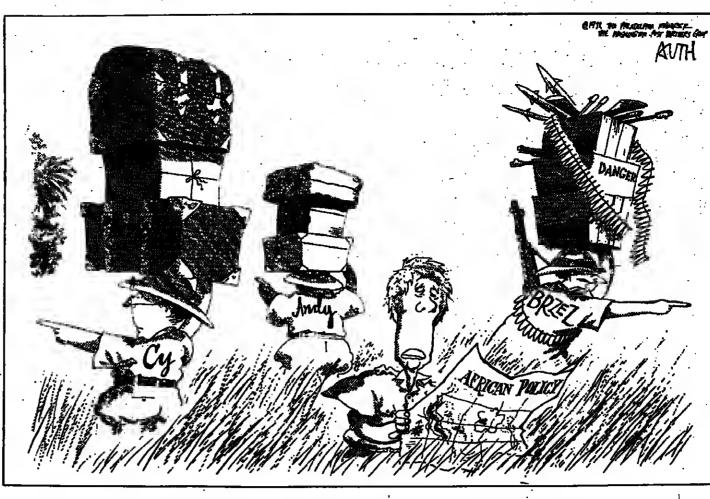

steward may whisper in your ear on your next transatlantic trip aboard a vessel of the North German Lloyd Steamship Co. The endless bottles of anti-seasickness syrups and pills will be bobbing away in the rough waters astem for a mask, reportedly cures seasickness almost instantaneously. The gas was tested on passengers on German ships and all the Lloyd liners are now equipped with the remedy.

Economic policy has political effects. Russell goes on to observe. When prices of food or housing or

The Consequences of U.S. Oil Quotas

By J.W. Anderson

WASHINGTON — Reductant-by, the Carter administration is now thinking and talking again about mandatory quotas of oil mandatory quotas of oil them up and what can you do? But is now thinking and talking again about mandatory quotas of oil imports. The administration's economists detest the idea. But Congress is eliminating the alternatives.

President Carter's first choice

was a tax on all oil, to discourage hie. In fact, there's very little differthe country from using it up so fast. Congress refused to enact the tax. The administration has been hint-ing that the president might use his emergency powers to impose a tariff on imported oil — again to discourage consumption. The Senate responded by voting to revoke the president's emergency power to

That brings the question back to quotas — limits on the amount of foreign oil that could enter the country. If the president's purpose is to hold down U.S. dependence of foreign oil import outset look on foreign oil, import quotas look, at first glance, like the most direct and simplest answer. But if you think that, you need to look more

Immediate Costs

First of all, imposing quotas means creating an artificial shortage in this country, Would the U.S. public tolerate it? Everything in current U.S. political behavior suggests not. The costs and irritations would be immediate; the gains, in national security and economic stahility, would be distant and controversial. An artificial shortage would mean lines at the service stations—
in effect, rationing by inconvenience — if gasoline stayed under
price controls. But if it were decontrolled, no one could tell bow high
the price might shoot with even a
minor tightening of the market.
But beyond that dilemma, there
is a whole range of dangers that mean lines at the service stations—
in effect, rationing by inconvenience—if gasoline stayed under
price controls. But if it were decon-

is a whole range of dangers that 'Americans need to think about before they embrace the idea of im-port quotas. It is not, after all, a pest is a subject of considerable new idea. The United States has had vast and recent experience with quotas on oil. Mandatory quotas ruled this country's oil trade from 1959 to 1973.

In those years, the quotas kept cheap foreign oil from swamping the domesuc producers. Today, of course, the U.S. position is exactly the opposite: Domesuc oil is much cheaper than foreign oil, and the domestic producers are producting only half of the country's demand. But, while the circumstances in the late 1970s are the reverse of those of the 1960s, recent experience car-nes certain pointed lessons for future policy.

Debate

Two economists, Douglas R. Bohi and Milton Russell, have just put out a book, "Limiting Oil imports," that deserves attention in this debate. It's published by Resources for the Future, one of the foundation-supported research or-ganizations that roost in Washing-

By keeping cheap foreign oil out of the country, Bohi and Russell calculate, the quotas were costing U.S. consumers over \$6 hillion a year hy 1970. The point is that the costs of a quota system are hidden. hut they are not small. Who bene-fited? Roughly balf of that money went to the industry. The other half was pure waste - the effect of using an expensive resource instead

The consequences of the quotas were far-reaching. Without them, Bohi and Russell write, "domestic output would have fallen by almost one half and price by one third." lt's fair to argue, as the industry does, that under those conditions the effect of the enormous 1973 world oil-price rises would bave been even more harmful in this country than they were.

Political Effects

But Bohi and Russell point out that the United States could have bought the same protection with a sariff around \$1 a barrel and a strategic oil reserve like the one that the government is now beginning to establish. The difference is that the consumer would have been paying a tax that went back to the government, instead of a cost that went to

their enemy. While they are wasting their resources and efforts on their

when gas and oil prices rise, the same people regard it as a political decision for which they can hold their government directly responsience between the ways that grain markets and oil markets work. But people don't see it that way. Why?

Because, Russell argues, years of government manipulation of the quota system left an indelible im-

haps as tar as the United States the

Israel's Choice

Ambassador Salah's article (IHT,

about a final settlement later.

Letters-

pression on the public that oil prices are simply a political decision, determined by nothing but which are canadian oil was exempt from interest pushes hardest.

Loopholes

The quota system was infinitely re-ceptive to loopholes, trimming and costly special exceptions. There were regional benefits, like the ex-emption of beavy fuel oil for New England. There were hreaks for certain companies, like the small refiners. Peculiar rules brought into life peculiar industries, like the

quotas, but Venezuelan oil was gen-erally not. South Americans saw it as another example of Washing-ton's discrimination against the Latin world. It was Venezuela that took the lead in organizing OPEC the exporting nations' cartel that now sets world oil prices. The political consequences of quotas may well bave been more important

than the purely economic ones— and might quickly become so again, if quotas were reimposed now.

Cambodia: What Not to Do

they are being formed. If the ravage of the destruction of tropical forests is not slackened they will

be doomed to disappear in three or four decades, paralleling the ex-pected drying up of the oil fields, but with far more severe conse-

quences for mankind.
"This downtrend must be stopped. But the time to do this

and choose another course is quite

short. Probably less than a decade. Mankind has no period of grace. It

must come to its senses now." How many times can a man call "fire" before the world turns and says

you liar" The "Limits to Growth,

although its many editions have

sold 2.4 million copies, is regarded by most people who know anything about computers, economics and

geology as hopelessy naive. Its mes-

ered today:

Extrapolation prohably never has been a very useful way of peering into the future. The Nobel prizewinning economist. Simon Kuznets, gives the greatest weight in major economic changes to what he calls "epochal inventions" — events which are unforeseeable by definition. He singles out as determining influences the hirth of great ideological movements — such as Christianity, Islam, the French and American Revolutions, and Marx-ism, together with basic institutional changes like the formation and

dissolution of empires. Does all this mean that the Club ously? On the contrary. Propaganda, if understood to be what it is, it has its value. "The Limits of Growth" partly succeeded because it was lucidly and plainly written. More important, it touched a nerve in modern man who is increasinly fed up with the filth, dirt and danger around him and is sensible enough to know that his environment is a delicate flower and cannot be raped indefinitely. As Eric Asbby once suggested, learning that the formula for sur-

vival is not power, it is symbiosis. Wrong Prognosis

"Limits to Growth" was as George Wallace used to say, apropos the polincians in Washington, sending them a message." The prognosis was wrong but the malady it described was essentially cor-

Within a decade or two, it is fair 1. lo say, if modern man doesn't tack-le the problem of nuclear proliferation, energy consumption, soil and forest erosion and diminishing per capita food supplies, be is likely to encounter at least one major catastroppe. It needs no computer to tell us that. The writing is already on the wall. In the long run, man stands a chance to succeed because he is inventive, creative and will all a usually, however long it takes, dust himself off after a fall and try again. But in the shon run he may only learn the necessary lessons by causing the deaths of countless numbers and wreaking appalling, havoc on the ecosystem. The Club Rome, 10 years old 10day, should not fear its critics. Happy Birthday.

U.S. Catholics Challenge Secrecy of Papal Voting

By Marjoric Hyer

NEW YORK, July 12 (WP) - A group of Roman Catholics yesterday launched a plan to challenge the centuries-old secrecy surrounding the election of the pope and make the selection of pontiffs more responsive to the interests of church members.

The key element of their effort. according to leaders of the newly formed Committee for the Responsible Election of the Pope, is a barrage of information on likely candi-dates for the post — with data ranging from authorized biogra-phies to candid observations on their lifestyles to Vaucan gossip.

The pope is elected by the College of Cardinals, meeting in secret conclave. Rules laid down in 1975 by Pope Paul for the selection of his successor assure that the forthcoming conclave will be one of the most secretive.

Al a press conference here, James Andrews, co-chairman of the committee and head of a publishing house, explained that the group plans "to distribute information about the Papabilim," — the Ital-ian term for churchmen considered likely papal candidates - to secular media and church leaders.

Candid Biographies

The committee's first effort is a 296-page book. "The Inner Elite: Dossiers of Papal Candidates," by Gary Maceoin, It contains candid and not always flattering biogra-phies of all 117 members of the College of Cardinals entitled to participate in a papal election.

The committee also is publishing a monthly newsletter that is a mix of high-level ecclesiastical gossip and of inner-circle speculation on who will succeed the aging and frail Pope Paul,

An item in the first newsletter, for example, notes that Cardinal Pericle Felici has a "passion for the latest audio-visual gadgets." It says Cardinal Felici has a camera with a telescopic lens with which he follows the movements of Pope Paul in the apostolic palace, which is op-posite Cardinal Felici's apartment. When Cardinal Felici is near the pope in televised ceremonies in St. Peter's Square, the scenes are re-corded in his apartment for replay

The newsletter suggests that Cardinal Felici's activities may be responsible for Pope Paul's strong measures against possible electronic surveillance in future conclaves. The newsletter and Mr Maceoin's book are published by Sheed, Andrews and McMeel, of which Mr. Andrews is chairman of the board. Most of the 27 persons on the committee are involved in publishing or journalism.

Long-Term Goal

Mr. Maceoin pointed out that, in addition to seeking to influence the selection of Pope Paul's successor, the committee has a longer-term

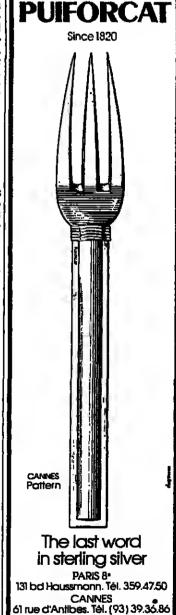

"We are calling for the improve-ment of the system," he said, adding that the committee favored including the heads of national con-ferences of hishops, such as U.S. Archbishop John Quinn, in future

miles from Williamsburg. "It tells us something about a chapter of early American history about which we knew nothing before." he said Hume, adding that

W — The discovery near Williamsburg Va. of a town and fort wiped out by Indians in 1622 has given archaeologists a rare

The most dramatic find has been the skeleton of a man Mr. Hume and field supervisor Erif Klingelhofer believe is the first victim ever found of the Indian uprising of 1622, in which 347 of the approximatey 2,500 colonists who had settled in Virginia were killed.

The excavation by a team of 14 financed by the National Geoture of early forts.

Mr. Hume described the period hetween 1610 and 1650 as "the Dark Ages" of Virginia history in discussing the importance of the site. The finding will not change the present view on this period be-"there really has been no view," he said.

The site had been identified as of interest during a survey of the land after Colunial Williamsburg ac-quired Carter's Grove in 1970, but work there did not start until last

U.S. Massacre Site Is a Time Capsule the site was unlike any other ever uncovered to the United States, both because of its age and because it has remained so untouched.

The first excavation placed the archaeological team squarely inside an irregularly shaped four-sided for measuring roughly 131 feet by 86 feet. Mr. Hume said. Instead of solitance of pointed logs finding a palisade of pointed logs side by side, like a Western fort, they found widely spaced posts. The gaps were closed with planking, and raised watchtowers stood

at the corners. Mr. Hume said. "Heretofore, we envisioned these lonely outposts as looking like something out of the Old West, with posts closely set graphic Society also has forced a side by side so arrows couldn't sharp revision in the popular picture. Jamestown has even been depicted this way."

Irish Parallel

Mr. Hume, a British archaeolo-gist who has been at Williamsburg for 22 years, said the fort with its nutlying civilian structures, is very similar to early British plantations in Ireland, which also were subject

Mr. Hume and Mr. Klingelhofer say evidence is convincing that they have found the site of Wolstenhalme Towne, founded in 1619 as the central town in an area called

Martio's Hundred. The 31-square-mile tract called Martin's Hundred was owned by the Martin's Hundred Society, a subsidiary of the Virginian Company of Loodon.
Martin's Hundred had a populatinn of about 140 on the morning of Good Friday, March 22, 1622, the day of a coordinated attack by

homes and settlements across Virginia. Of the 140, 58 were killed and 15 were captured, Mr. Hume Mr. Hume speculated that the Wolstenholme survivors fled to the fort until the Indians withdrew and then sent ships to nearby James-town for help. When a ship arrived fram Jamestown, the survivors hurriedly buried their dead and left for

the Afgonquian Confederation on

and burning of the fort and town. After the skeleton was found, the archeologists also found a broken smoking pipe which e British ex-

Jamestown. The Indians then re-

turned and completed the looting

low the body, which could have been expected to blow in from the buildings burning nearby, and they found the man bad not been placed carefully in the grave but tossed in.
The body was pushed against one side of the grave in an arc, with the left arm under the left buttock.

The final convincing piece of evi-dence that the man they had found was a massacre victim was "evidence of murder." Mr. Hume said. The back of the skull had been crushed in by a massive blow, according to experts at the Smithsonian and the state medical examiners. The injury fit the method of attack the Indians, who filtered unarmed into homes and towns in the colony, then ettacked with tools

and weapons of the victims.

Mr. Hume said in a telephone in-

pert says could date from about of early American pottery." Also, a 1620. They found flecks of asb befull helmet with cheek plates and hinged visor — the first found on a U.S. Colonial site — and bullets, firing mechanisms and musket barrels have been found. Mr. Hume said the pottery was

made "by people with considerable talent" and backs up what he de-scribed as the "theory of the thwarted immigrant. They had been trained to make

good pottery, but they lacked the necessary material and equipment. The clay was not good and the kiln nnt hot ennugh," Mr. Hume said. "The craftsmanship was as good

as England but the end product wasn't. They made all sorts of shapes, handles, scroll decorations. But their results were less than they were used to. As you get later, you get deterioration in decoration and the next generation finds the cus-tumer will settle for less and doesn't bother with the fancy stuff." be said.

Tokyo Runs Aid Center For Women
By Richard Bill

POKYO (AP) — In feudal Jupan, women fleeing abusive husbands often sought refuge in Buddhist temples. Today they can fiod safety and help in a secret hideaway run by the Tokyo govern-

The Metropolitan Women's Counseling Center, the first public institution of its kind in Japan, is in a quiet backwater near the city's bustling Shinjuku district. Its exact location is kept secret to avoid pur-

suit or reprisals from angry has bands. Women seeking help can tele-phone the center's number, which appears on television and is pub-lished in newspapers. If a busband

calls, the operator bas instructions to tell the man his wife is not there. The three-story complex includes a dining ball, a playroom for chil-dren, offices and medical facilities. Rooms furnished with mats as beds, Japanese-style, can accommodate up to 30 women and their children. Their period of stay is limited to two weeks. There is no fee.

Kaoru Kasama, who beads a counseling staff of 50, said that nearly 600 women have sought help at the center since it opened in April, 1977. Some, she said, were beaten so badly by their busbands that they required immediate hospital attention. One woman's body was covered with cigarette burns. Another had broken bones.

Miss Kasama, a soft-spoken woman in ber 50s, said that she thought the reaction to the center was only the tip of the iceberg. She said that many family flareups are not reported to authorities and many women are too frightened to leave their bomes for fear of what might happen to their children.

In addition to wives beaten by busbands, she said, the center had received 80 mothers escaping from teen-age children who used violence against them, and other mothers and daughters running away from the bushand-father who sexually molested the daughter.

Miss Kasama said that she thinks that the availability of pornographic magazines filled with sex dominated by sadism has contrib-uted to vinlence. "Naturally, the wife rejects the advances of her mate when he wants to try these things," she said. "Very often the man is drunk and then he gets

angry."

The main problem faced by the center is how to help these women on the road to independence. Few have the qualifications for a job, The majority eventually find work, but for another 20 percent, the challenge of living alane is too difficult and they return to their husbands.

Presumed victim of a 1622 Indian uprising grimaces from a grave found on Carter's Grove Plantation, a few miles from Colonial Williamsburg. Site has yielded hundreds of artifacts.

Eating Out in Paris

China's Haute Cuisine as Learned in Prison 'School'

'60]

By Naomi Barry

DARIS, July 12 (IHT) - "There are estimated to be about 160 Chinese restaurants and over 1,500 Vietnamese restaurants in Paris." said Jean Pasqualini, owner of La Pone Fonune. the same menu. That's the fault of the French. The Chinese serve what you want. If all you ask for is egg roll, sweet and sour pork and chop

suey, that's what you'll get."
Pasqualini, born in Chioa of a Chrisican father and a Chinese mother, achieved a certain fame with a book, "I Was a Prisoner of Mao." which did fairly well in the United States and became e best seller in France. The book describes his eight years as a prisocer

of the Cultural Revolution. He now lives in Paris with his Hong Kong-born wife, Pauline. At present be works as an archivist for Newsweek and a teacher of Chinese political terminology at the Ecole des Langues Orientales and the Ecole Superieure des Interpretes et Traducteurs.

Some months ago his father-in-law who still lives in Hong Kong, urged Mr. Pasqualini to open a res-

on the idea that when all else fails, repertory. you can always eat.

The "X" near Williamsburg marks the site of the archaeological discovery.

new note in Paris-Chinese restaurant cuisine. Pasqualini hired a Taiwanese, Cheng Kuo-bing, originally from Hooan Province, who was ooce chef for the Nationalist Chinese Embassy in Abidjan, Ivory

Banquets of the Mind

Pasqualini's knowledge of cooking began in the prison camps, where the food was subsistent but the spiritual banquets were grandiose. At the beginning of the Cultural Revolution, Peking's most venerable chefs were called together and told to develop a new cadre of cooks in six months. They said it couldn't be done. For their frank-ness, the chefs were arrested, ac-

cording to Pasqalini.
To fill the pits in their stomachs and to keep their minds occupied, they discussed menus in detail with their fellow prisoners and described taurant. Having a restaurant is a the step-by-step methods to achieve

subconcious survival concept based the most refined dishes in their

During two years of self-imposed La Porte Fortune is a family ef-fort . Mrs. Pasqualini, brother Sammy, his wife, Mary, and Jean, who serves as adviser. To provide a became aware of what was going on, they were enraged, finding the procedure a bizarre form of counterrevolution coming from chefs who, when at large, had refused to

comply with government orders.
"We were of two schools," said Jean over dinner at La Porte Fortune. "There were those who thought that talking about deli-tious food helped you forget suffer-ing. There were others who felt it only accentuated your troubles.

"My feeling is that daydreams are better. You know what we say, 'The optimist looks back. The pes-simist looks forward'."

The First Dish

When liberated, he put his knowledge into practice. "My first dish was a Peking omelet into wheb you stir coopped chicken, chopped fried leeks and mushrooms. Dried Chinese black mushrooms must first be pre-soaked, I knew very well from my teachers that if the water is too hot, it takes away the taste. If the water is too cold, the mushrooms do not open.

"I wish I had been able to make notes in those years. It would bave made a wonderful cookbook."

Pasqualini and Cheng. who has been on the job for two months now, are out to give Parisians an example of nonexport Chinese cooking For 240 francs, a party of six to eight (the Chinese rarely eat in smaller groups), can have the following meal, exclusive of drinks and the 15 percent service. In classical terms, the welcome is

an arrangement of fruits, nuts and watermelon seeds. The second course of Chinese hors d'oeuvres might include spiced

beef, cold pork, pork liver, cold chicken and shrimps.

Course three would be shoulder nf pork, the whole shaulder braised

in soy sauce. This would be fol-lowed by shrimp io spicy sauce. Course five would be beef with silver threads. The latter are thin. fried vermicelli noodles. The julienne beef — presented within a nest of these silver threads — is tossed with mushrooms, bamboo shoots and specks of red and green

For No. 6. there is porc a la Pekinoise, the shredded pork and onions meant to be eaten in little wraparound paneakes. Course seven is chicken velvet, a

melting combination of white meat of chicken coated with egg white. The finale would be a soup like

cucumber with tiny meatballs. The Chinese like to eod a meal with

soup, which is considered a refresh-

For a more modest family-style dinner, La Porte Fortune suggests a A list five-course menu. Opener would be minced pork, beef, crab and chopped water chestnuts formed into balls, deep fried and then bra-

Course two is a Peking omelet, followed by a lovely dish of eggplant with garlic and smoky

Course four would be chicken with greeo peppers.

The windup would be a noodle soup enriched with slivers of chick-

en and bam. A party of six nibblers should be able to get up from the table lighter of 126 francs, drinks and service excluded.

(La Porte Fortune, open seven days a week, is at 4 Rue Beethoven, Paris 16. Telephone: 520 02 37. An advance call will enable an old China hand to get whatever he wants. Oth-erwise, the staff will suggest. English, French and Cantonese are spoken.)

Iron Age Site In Tanzania

DAR ES SALAAM. July 12 Ray (UPI) — One of Africa's early Iron Age industrial sites bas been discovered in the west lake region of the country, the Tanzanian Scientific Research Council has

announced. The discovery was the result of a three-year project conducted by Dr. Peter Schmidt, a professor of archaeology at Brown University in the United States.

A statement issued by the Research Council said the sites were discovered near Kemondo Bay on Lake Victoria during construction

nf an access road. A large section of the site was destroyed during road construction. but we were still able to excavate at least 13 early Iron Age smelting furnaces, several large refuse pits filled with industrial debris and an early Iron Age house and poles. Dr. Schmidt said to the statement.

A Baryshnikov Debut

Japan Import Plan To Top \$4 Billion

TOKYO. July 12 (Reuters) -Japan's emergency import program to reduce its buge trade surplus will exceed \$4 billion, the Ecocomic Planning Agency said today.

The estimate was made in accordance with the government's decision last month to accelerate implementing a program for emergency imports announced last April, the EPA said. High on the list are increased imports of aircraft, ships and uranium ore.

The announcement came as Prime Minister Takeo Fukuda prepares to attend the summit meeting of leading industrial nations in

Japan Said To Hold Up Trade Talks

GENEVA, July 12 (Reuters) — President Carter's chief trade nego-tiator Robert Strauss indicated today that Washington believes that Japan is holding up progress on the international talks underway here.
"We are rather pleased with the

progress we bave made so far with the European Economic Community. Canada, Australia, New Zealand, the Nordic Countries, some developing oations," be told a news conference

Asked why be had omitted lapan, he said: "It would be inaccurate to characterize our progress with japan as I have charactrized the others.

He said the U.S. delegation planned to containe discussions with various other delegations until he leaves tomorrow evening for the Bonn summit, but he said that "we have no immediate plans" for fur-ther meetings with the Japanese.

Airbus Gets Go-Ahead, U.K. Is Out

Sixty Orders Placed For Smaller Version

PARIS: July 12 (Reuters) — France today decided to start mak-ing a smaller 200-seat version of the A300 Airbus known as the B-10 io cooperation with its West German, Dutch and Belgian partners — without waiting for Britain. The government authorized

Transport Minister Joel le Theule to launch production, said a state-ment issued after today's weekly cabinet meeting. The French and West German

overnments will complete the industrial arrangements so that the first airliners could be delivered at the end of 1982, it said. Mr. le Theule told reporters: "At

present, the British government has not expressed intention of cooperating in building the B-10. We must not let the expectation of its decision delay the start of the construct He added: "If the Britisb wished to participate, we would examine their request. But above all, we do not want the start of construction to be delayed."

60 Ordered He said the government decided to go ahead as orders from major ioternational airlines for the new plane totaled 60,

Agreement has been reached between France's Aerospatiale. West Germany's Messerschmidt Blokow Blobn (MBB). Spain's Construcmillion for iron ore pellets, ciones Aeronautics (CASA) and A further \$2.2 billion worth of imports were considered "virtually sharing.

Mr. Abe said those imports considered to be nearly certain to materialize include advance payment of \$1 billion for uranium aircraft, rather than working with enrehment, \$430 million for crude Boeing, or some other U.S. aircraft oil for stockpiling in tankers and maker, to develop a new medium-

strength of the European aerospace

He also said 36 ships built by overseas subsidiaries of Japanese shipping lines are in the also said 36 ships built by **Dividend Passed**

From Wire Dispatches
FRANKFURT, July 12 — Adam Opel's net profits plummeted to 339.5 million Deutsche marks in 1977, down 55.6 percent from the previous year, and the company will forego payment of a 1977 divi-dend to its parent, General Motors, chairman James Waters said today.

Despite a 4.2-percent rise in turnover to a record 9.166 billion DM, the earnings decline resulted from higher tax requirements, increased personnel costs and reduced export earnings due to the appreciation of the mark, which could not be completely offset by increased prices and productivity,

Although be said 1978 earnings would be similar last year's, he would oot rule out a dividend pay-ment for 1978. "That would put us in a position to pay a dividend," he said, ooting that the 1977 payout was passed due to investment requirements and other considera-tions. The company paid 774.4 mil-lico DM dividend for 1976.

FINANCIAL NEWS AND NOTES

Japan Firms Seen Raising Profits

Major Japanese enterprises can expect increased profits in the current fiscal year, despite the sharp appreciation of the yen, according to a survey by the Japanese financial daily. Nihon Keizai Shimbun. The survey of 100 major companies found that operating profit in the current fiscal year should rise 3.6 percent with the dollar trading at an average of 200 yen and gain 1.4 percent if the dollar weakens fur-ther to 190 yen, benefiting from lower imported material costs. At a temporary rate of around 200 year to the dollar, foreign-exchange gains by those surveyed from lower raw material costs will total about 1.18 trillioo yen (about \$5.9 billion) for the year. while foreign-exchange losses will be about 1.17 tril-lion yen. If the dollar falls to 190 yen, foreign-exchange gains will reach 1.4 trillion yen, while losses will come to about 1.27 trillion yen. The survey said electric-power producers and gas and oil refiners can expect earnings to increase 7 percent with the dollar at 200 year and 14 percent if the dollar drops to 190

Kaiser Ups Price for Ashland Unit

Ashlaod Oil has approved the sale of its 83-percent interest in Ashland Oil Canada to Kniser Resources Ltd. for \$Can.33.50 a share. or \$Can.1 higher than the price previously agreed upon, because of com-petitive bids Ashland received from other concerns.

The transaction, valued at about \$Can,368.5 million hased on Ashland's ownership of about 11 million of Ashland Canada's 13.1 million outstanding shares, is subject to clearance by Canada's foreign investment review agency. Kaiser Resources is about 33-percent owned by Kaiser Steel Corp.

Sumitomo Bank Plans Merger

GE Net Up Fed Said in Difficult Role 17.5%; RCA In Fight Against Inflation

The Federal Reserve faces "a very, very difficult role" in its battle

against inflation, chairman William

He emphasized that the Fed re-

mains committed to reducing infla-tion below present "unacceptable"

levels. But he added that he is anx-

ious that the Fed avoid adopting

overly restrictive monetary actions

that could plunge the nation into a recession, which he predicted would compound inflationary

He also predicted that the fight

to achieve price stability, lower un-

employment and a stable dollar will be "a long one." Speaking at a

seminar here sponsored by govern-ment securities dealers, Mr. Miller warned: "There is no six-mooth so-

lution to our problems of inflation,

the dollar and employment. It has

got to be a sustained effort over the

Commenting on his widely publi-

next five, six or seven years."

Miller said yesterday.

Not Ilute Dividend of CED Chara	E-	0.40	

PRODUCTION START-UP OF NEW RESOURCES

Prospects for the near future depend upon the situation of European refining and marketing, where losses have affected the amount of funds allocated for exploration. Disengagements may also be necessary in the European refining and marketing sectors, However, a few positive factors are on the horizon for the Group. Now that development work for the Frigg gas field in the North Sea is cimpleted and that the Bekapai and Handil fields in Indonesia are operating at full capacity, income from these new production areas should be on the rise and, at the same time, investment cost should drop, in 1977, self-financing covered 70% of investments as against only 50% in 1976. Thus, conditions should improve progressively, allowing the Group to pursue its primary role as producer of oil. At the same time, it must consolidate and expand its worldwide market for natural gas, uranium, and coal, while continuing research into new sources of energy; solar, geothermal, etc. In addition, expertise acquired in the various sectors of the oil industry, and know-how accumulated in the domain of organization of complexes, are being effectively applied in the area of industrial cooperation. Two important industrial cooperation agreements were signed in 1977, one with the Abu Dhabi Emirate and one with India. Several projects are being negotiated with governments of the Middle East, Africa and South America.

The brochure "CFP and the TOTAL Group in 1977" is available on request in French and in English at:

BOOKS

ECONOMICS IN PLAIN ENGLISH

All You Need to Know About Economics in Language Anyone Can Understand

By Leonard Silk. Simon & Schuster. 216 pp. \$8.95

Reviewed by Christopher Lehmann-Haupt

is called "What Economics Can Do for You." Its gist is that "economics can help you reason more clearly about issues. For economics offers a special approach to reasoning about problems, an approach that has six main elements: 1. Define the problem or issue carefully and assemble the relevant facts. 2. Identify the goals and objectives you hope to achieve. 3. List the alternative means of attaining your goals. 4. Identify the economic concepts needed to understand the problem you are working on and analyze the alternatives in terms of those concepts. 5. Choose the alternauve that appears to solve the problem best — and act on it. 6. Verify whether that alternative

Now, this "special approach to reasoning" strikes me as a good ex-ample of what the Germans refer to expressively as quarsch, meaning nonsense. Except for its reference to "economic concepts" in item 4, it has no more to do with economics as a discipline than it does with crewel embroidery or gravestone rubbing or plain old common sense. It resembles, more or less, a wild boar's "approach to reason-ing" when that beast determines to secure a truffle hidden in the earth. lts inclusion in Silk's primer smacks of some gimmick-obsessed editor's suggestion that the author sell economics to the man on the

street. It patronizes: Worst of all, its presence in the book is unnecessary, because, at his estimable best. Silk makes it more than apparent "what economics can do for you." In an earlier secuon on the pitfalls of protection-ism, he demonstrates simply and lucidly why the Hawley-Smoot tar-iff of 1928 "helped bring on the Second World War in Europe and Asia." (How often do you hear Hawley-Smoot listed among the major causes of World War 11?) In a chapter called "The World Economy," he illustrates how the disappearance of anchovies off the coast of Peru in 1972 contributed to world inflation in the mid-1970s. ("Peru's anchovy catch fell from more than 10-million tons to 2-million tons in 1973, wiping out a criti-cal part of the world's fisb-meal supply, which is used to feed live-stock. The markets for cattle, pigs, and anchovies are interdepen-In sum, what economics can do

for you is to plug in your under-standing to the hidden causes of much that goes on in the world. Though reading "Economics in Plain English" doesn't convert one to a rank economic determinist, it reminds one how often our fuzzy comprehension of the economic facts of life lead us to overlook certain crucial realities.

Another reason Silk's somewhat

silly conclusion is disappointing is that it further diverts him from his altogether useful purpose in writing this book — which was to spell out st and most terms the often clusive concepts that underlie the so-called Dismal Science. Here again be gets off to a strong beginning, recapitulating the history of economics through the ideas of Adam Smith, Thomas B. Malthus, Karl Marx and John Maynard Keynes, so that what we vaguely perceived before suddenly comes into sharpest focus.

"Alas, however," he writes. Keynes's program for getting rid of unemployment by increasing the monetary demand for goods and services "bred chronic inflation.

THE 10TH and penultimate And fighting inflation merely by chapter of Leonard Silk's une having government reduce total de-ven "Economics in Plaio English" mand bred recession and unem. mand bred recession and unemployment. This where we are now plagued by unemployment or infla-tion or both at the same time." This description of our present economic distress has been stated many times before, but rarely quite so

But unfortunately. Silk seems gradually to lose sight of his original purpose. And wouldn't you know that be stops being elementary just when I needed him to be most simpleminded. No doubt his brief history of "The New New Yorks" brief history of "The New, New Economics — and Nixonomics" or bow former President Nixoo precipitate conversion to Keynessianism helped to exacerbate "stagflation" in the 1970s — is a small masterpiece of pithy summa-

But he neglects to spell out the most fundamental fact of all precisely how a deficit in a national balance of payments serves to create inflationary pressures. I know the explanation of this phenomenon is elementary. But elementary explanations is what I was mentary explanations in plain. looking for to "Economics to Plain English." Coming where it does in the text, the author's six-step illus-tration of "What Economics Can Do for You" seems like a desperant attempt to recapture the book's lost

As Silk is well aware, the difficulty for most people with economic concepts is that they are too abstract for casual consumption. They don't stick to the ribs, because they are hard to relate to every street of the cause they are hard to relate to every street or the cause they are hard to relate to every street or the cause they are hard to relate to every street or the cause they are hard to relate to every street or the cause they are hard to relate to every street or the cause they are hard to relate to every street or the cause they are hard to relate to every street or the cause they are the cause the eryday experience. For instance, it does me no good to be told the difference between monetary and fis-cal policies according to the lune-uous each performs, as Silk tries to do. I forget as quickly as I am told. The only way I can remember the distinction is to recall that "monetary" comes from the Latin formoney, while "fiscal" derives from the Latin for basket or bag. I picture. I looke Sam, throwing coin. ture Uncle Sam throwing coins about with one hand and collecting taxes in a basket with the other. That's my idea of economics in blain English. To judge from his best writing a:

an economic columnist for The New York Times, Silk could be First-rate at constructing this sort o definition. But in his latest book, he performs unevenly. Except in the first few chapters, he either write too plainly or not plainly enough.

Smoking Ban Gains in D.C.

WASHINGTON, July 12 (AP) —
The District of Columbia Cit
Council yesterday tentativel
banned smoking in most public
areas of buildings in the distric. but the move will not affect the leg endary "smoke-filled rooms" federal politicians.

The council's measure does no apply to federally controlled of owned buildings, such as the Capi of the presidential staff or federa bureaucracy.

The measure will allow smokin to continue in hotel lobbies and restaurants. It still requires fiat approval by the council, and b Congress, which has veto power over district ordinances.

Neolithic Chessmen On Show in Russia

MOSCOW, July 12 (API - Sovie. archaeologists have determine that chess was played in the Ston.

To Hell With Mom

And Apple Pie Too

NEW YORK, July 12 (NYT) - Now comes that smothering

midsummer bore, baseball's so-called All-Star Game, which started

45 years ago as a circulation booster for the Chicago Tribune and

has developed into a massive sales campaign for razor blades.

Apart from the reek of hucksterism, the only trouble with the pro-

motion is that the teams are not all-star teams, the method of

selection is cumbersome, inefficient and flagrantly dishonest and it

is no ball game when a pitcher throwing a no-hitter has to leave

after three innings. The good thing about it is that receipts help

Like many Americans, Bowie Kubn confuses size with quality.

get out a vote of these proportions inevitably results in injustices

"I know of this kid," says Sparky Anderson, "who has about 5,000 ballots and he's punched them all out and turned them in.

There's got to be a more legitimate way to determine who the best

Of course there is, but the legitimiate way wouldn't produce the numbers that Bowle dotes on. To get millions of votes, about 130

nominees are chosen before the season opens and punchcards bear-

ing these names are available in ball parks and on drugstore count-

ers for months. Chances are the kid Sparky knows about didn't even have to buy a razor blade to collect his 5,000 ballots.

where election fraud is oot unheard of, the Phillies ran a high-

pressure box-stuffing campaign that got Greg Luzinski and Larry Bowa on as starters with 3,503,738 and 3,396,094 votes, respective-

Philadelphia voters also punched ballots for the American

League team. No American Leaguer has been seen in that town

since the Athlerics defected in 1954, so the clients weren't familliar with the talent. They do remember the Milwaukce first baseman, Don Money, who used to play shortstop and third base for the

Phillies, so they swept him in at second base ahead of Willie Ran-

Besides putting a first baseman at second, where he has played

Reggie Jackson, who is either a designated hitter or a television star

or a right fielder. If Jackson had not called in sick, one of them

would have had to play in center until Martin could have used Fred

Sparky Anderson is off target when he suggests that the election is held to determine who the best players are. From the beginning it

has been run to determine which players the public most wants to see. In 1933 Arch Ward, sports editor of the Chicago Tribune, decided the World's Fair called a Century of Progress needed an-

other attraction besides Sally Rand, the fan dancer. He talked base-

ball into running a "dream game" in conjunction with the fair. (It

was every fan's dream, he argued to see players like Babe Ruth, Lou Gehrig and Jimmy Foxx against Frank Frisch, Carl Huhbell

Arch's interpretation of dreams didn't put Sig Freud ont of busi-

ness, but it is a fact that voters still are influenced by factors other

than all-round excellence. For example, Boston's Dwight Evans is a

better right fielder than Reggie Jackson, throws better and hits as

Com,pu#ter(Gets It Rite

from the Tribune and cooperating newspapers. Later the baseball hierarchy took charge of the election, trying out various systems

until 1970 when Kuhn turned the game over to the Gillette people

Because of this year's mess, the commissioner's office is talking

about limiting all big league cities to the same number of ballots,

and nominating outfielders for specific positions in left, center or right. This is like putting a Band-Aid on a leper. As long as the

election is buge and unsupervised there will be fraud. This year the

Texas Rangers threw out 54,000 ballots that were mathine marked

their popularity, but they would rather use the three-day break in

the championship schedule to go fishing. Thurman Munson begged off this year to rest a gimpy knee and Carl Yastrzemski, with his

face not quite as straight as a string, reported minor back spasms.

How to correct all the abuses? Let the players pick the lineup,

not voting for teammates. They know who is best. Chuck the rule

requiring that every club in the league must put a representative on

the team. You can't get an all-star team that way. Abolish that

ridiculous rule limiting a pitcher to three innings' work and let the manager play to win, not to get 23 names into the box score.

Better still, throw out the whole bloody exhibition.

As for the players, they like to be chosen because it is evidence of

In Arch Ward's first election, readers filled out ballots clipped

Steve Garvey

The three straight walks made it 3-1 and Garvey followed with his two-ruo single, tying the game.

Now the game settled down to a duel of relievers. Lary Sorensen of Milwaukee worked three scoreless imer issued consecutive walks to Morgan, George Foster and eg Luzinski, forcing in the first monal League run. two imnings apiece. Then came the decisive eighth with Garvey's leadoff triple starting the rally.

Why It Happened

A moment later, he trotted home with the tie-breaking run when

Yankees uncorked a wild pitch. "I just started muscling the ball and l just tried to throw it too hard," Gossage explained. Suddenly, the tight ball game came apart at the seams for the

American League. Dave Concepcion walked and Dave Winfield singled to left. When Chet Lemon booted the bail for an error, the National League had runners at second and third with none out. Then Boh Boone hit

a two-run single for a 6-3 lead. Boone advanced on an infield out and then dashed home when Davey Lopes got the fourth hit of the inning.

Armed with the 7-3 lead, Bruce

Sutter of the Chicago Cubs retired the first two hitters in the ninth. Then Lasorda went to the mound and called for 39-year-old Phil Niekro of Atlanta "Niekro has been an All-Star five

times and has never pitched," said Lasorda. "I thought he deserved the opportunity. **Ouick Ending**

Actually, it was Niekro's third All-Star game, but the veteran knuckler did oot pitch in either of his first two. He came on to retire pinch-hitter Darrell Porter, ending

It continued the frustration that has built over the last two decades for the American League, which has lost 20 of the last 22 contests

and now trails in the series 30-18-1.
"I wish I had the answer," said the American League manager, Billy Martin. "If I did, we might have on tonight." Earlier, the answer seemed to be Carew, who opened the first and third innings with triples and

by George Brett and then on a sacrifice fly by Brett. The Kansas City third baseman scored the second run himself on a fly out by Fisk.

Los Angeles Ultimatum to IOC

By Kenneth Reich

LOS ANGELES, July 12 - Mayor Tom Bradley has decided that if the International Olympic Commit-tee is unwilling to sign a contract with the private Los Angeles Organizing Committee - thereby absolving the city of Los Angeles of financial liability for the 1984 sum-mer games — the city should withscored both times, first oo a double draw its bid for the games.

The mayor's position, as conveyed yesterday by his oews secretary, Tom Sullivan, makes the latest Los Angeles offer to the IOC a take-it-or-leave-it proposition. Facing the IOC's July 31 dead-

line to Los Angeles either to sign a contract agreeing to all IOC rules or to lose the Games, the private organizers are waiting somewhat of impatiently for an IOC response to che the offer made in Mootreal three weeks ago.

Shift of Reponsibility

That offer entails having the private organizers and the U.S. Olympic Committee, rather than the city. accept liability for the proposed games here. But under the 10C's Rule 4, such

liability must be accepted by the city, and the IOC's nine-man executive board is now being polled on whether it is willing, in effect, to alter that rule and sign with the prihis oews secretary, make plainer than ever the mayor's pladevate organizers. Bradley's views, as expressed by

saddle Los Angeles taxpayers with any deficits that could develop from holding the 1984 Olympics "If the IOC does not accept the

offer of the private Olympie Committee, then as far as the city is con-cerned, it's over," Sullivan told the Los Angeles Times. "We will not pursue the Olympic Games any

"Gino and Horse, they could hay a whole block of Manhattan and not even miss the money," Donovan said.

The group got together the day before the game for a cocktail re-ception and reunion of sorts. Most said they didn't feel particularly old. "Time passes so swiftly you hardly notice," said Brown. But greatest game ever played."

Last week they played it for laughs and film on a softball field Parker, who looked professorial with his pipe, felt an ache in his knees, and Marchetti had to langh when Donovan said to him, "Tell the truth, it feels like 40 years since the game.

Wilkens Signs than 35 — their names stenciled on their shirts so the audience could tell the players without a scorecard. The Colts still won, and the Gi-With the Sonics ants still lost. This time, it was 28-SEATTLE, July 12 (AP) - Len-

oy Wilkens, the coach of the Seattle SuperSonics of the National Basketball Association, has signed a five-year contract in which he is to remain coach and director of player personnel for three years, then assume an "executive position" for the final two.

"I think the big thing in my con-tract is the money," Wilkens said.
"They were willing to give me the other things I wanted ... I think when someone does something of value, they should be compensat-

Financial terms of the pact were oot disclosed. He had engaged in and Moore, throwing such beautiong contract negotiations and even ful spirals that the honorary Parker, Art Donovan and Steve Myhra. The Giants were represent-ed by Rote, Frank Gifford, Pat demands were oot met. threatened to leave the team if his

Wilkins brought the Sonics from a 5-17 record when be took over as coach last November to the championship series, in which Seattle lost to the Washingtoo Bullets.

unwilling to risk scrambling into a booth — and watched a film of their championship game. There was the usual amount of cheering and booing that one might expect at such a gathering, but at least two men were visibly moved by what they saw. Unitas gazed at himself on the screen as if he was studying his old scrapbooks. And when Ameche, who says he lives in the present, watched himself score the winning touchdown, he shielded his

whether there was a tear in his eye. Mostly the Colts cheered, and mostly the Giants sat stoically. Toward the end Rote excused himelf. "Most of our guys have spent the last 20 years trying to forget this game," he said. "I've seen the ending. I'm going to get a beer."

The game was played the next afternoon. But it wasn't played all

eyes with his hands and it was im-

possible to tell in the darkness

that seriously. "I'm gonna bold, like everyone else," Donovan said. "I can't walk, let alone run. As long as they come close to me, I'll get them. Look at Gifford, he's a TV star. Me? I was fat when I was born."

Little Stage Fright In contrast to some of the

Giants, who were so used to the cameras and so cool that some seemed frosted, the Colts were loose. When Myhra brought a sixpack of beer over to the Colts' bench, Marchetti proclaimed, "O.K., here's our pregame meal." Unitas warned up with Ameche

referee. Sonny Jurgensen, was moved to say, "John, your arm looks lovely.

Unitas giggled. "It should," he said. "I've had five years off."

The whole scene was casual. Players were signing autographs

Most of them sat around tables

— Donovan was quick to claim a chair because at 310 pounds he was chair because at 310 pounds he was and, as Myhra said, "It feels good them intercepted, prompting Webster to crack this joke, "Same old Charlie."

Then, after Unitas hit Berry for a to be remembered." Fans gathered, maybe 600 of them. One, a 43-year-old man named John Miller, who said he was from "the Bronx, the Bronx Zoo," shouted at the players from behind a rather conspicuous consumption of beer.

'C'mon Giants." he yelled, "let's kill these guys. Don't let no Don Ameche run over youse again ... Hey, look at Unitas. He's sleeping over there under a tree. Somebody better tell dat jerk he's gonna get mugged.' Colts Favored, Naturally

The betting line, it was said, was

Colts by 6 points. The other betting was oo the duration of the game. It was scheduled for two 30-minute balves. "That's a long time," said Rote.

"I'm not sure any of us will make it for the second one." The Colts opened quickly. On the sixth play Unitas found Moore in the end zone for a touchdown.

'Seven-oothing.' Jurgeosen "Hey, isn't it 6-0?" a fan yelled.

"Seven-nothing." Jurgensen insisted. "I'm booking the game." The Giants got no points in the first half. Conerly's first pass was beer. Jurgensen reached it first.

45-yard touchdown a few minutes later, Webster said, "Thiog's haven't changed much." It was 21-0 at the half after Berry caught an-other bomb, and by then Gifford had taken over as quarterback from Conerly.

Sideline Coaching "Frank likes to throw," Conerly

"Hey, put Conerly back in there," a fan said, pleading. "Please," Conerly said, laughing

on the sideline, "leave me alone." The Giants got on the hoard in the second half as Rote pulled a fast one — hiding on the sideline, then sneaking into the end zone before the hall was hiked - and Gifford hit him.

"I call it outright cheating," Rote said later. "We should have used it 20 years ago." Gifford found Webster for an-

other score to make it 21-14, but the game was clinched when Unitas intercepted a Gifford pass with less than one minute to play and ran it m for a touchdown. The players left the field sweaty,

hut happy.

Art Buchwald

Television's Secret

WASHINGTON — If you're wondering why all the action shows on television look alike. I thick I might have an explanation. It was revealed by a television star, who told me that if I used his name he might never work again.

So what's the secret?" I asked. There are only two writers in Hollywood scripting every television action

drama." "What are their names?" "Al and Harry." "Why only

two? Because no 💂 🍘 televisinn pro-ducer wants to Buchwald take a chance on new writers. Al and Harry are proven commodities. They started with 'Peter Gunn' and they've been signed up for every program that's been on TV since. Whenever someone wants a new show. Al and Harry get the call. That's why all the shows look

"I don't understand. Why would Al and Harry write the same show over and over again.?"

Court Orders Payson Estate To Pay the Met

MINEOLA, N.Y., July 13 — The executors of the estate of Joan Whitney Payson have been ordered by a court to pay the Metropolitan Museum of Art a \$1.5 million halance on a \$5-million pledge made during a casual conversation between Mrs. Payson and the museum's president.

According to lawyers for the museum, which brought suit when Mrs. Payson's estate refused to fulfill the pledge after her death to 1975, in 1971 Mrs. Payson had agreed to donate \$5-million toward show writes itself. You bring in an-

ately whether the executors would mind making them the heavies appeal the decision.

"Look if you watch most action dramas, it's 10 percent dialogue and the rest of the time the characters speed around in automobiles. The most creative work Al and Harry have to do is figure out where their people are going to

chase each other. "It's true that most shows take place in automobiles." I admitted. But at the same time, it must be hard to think of new ways each week to send a car over a eliff."

"I'm not saying that they don't have talent," the television star said. "I remember the first time Al. or maybe it was Harry, came up with the idea of having a helicopter chase a car. That was a real hreakthrough in television writing. It was so successful that they now use it in

every niher show they do."

They must be terribly husy." "What have they got to be busy about? They have a card file of all the plots they ever used. When they dn a new show, they go tn the file and rewrite the same plot. Then

they play tennis all afternoon."
"But it seems to me that at the end of the acton dramas. I always see different writer credits un the

"They're all pseudonyms for Al and Harry. The studios provide the names because Al and Harry don't have the imagination to think up their own.

"But why Al and Harry? Why not Sam and Max?"

"Al and Harry own the copyright on the psychopathic killer. They in-vented him during one of the early episodes of 'Dragnet' Without a psychopathic killer, you can't have an action drama."

"Why is the psychopathic killer so important to these shows?"

"Because you don't oeed any eharaeter development. Almost every show starts out in a police station. The phone rings and the sergeant says. There's a nut on the roof of City Hall and he's threatening 10 hlow up the city water sup-ply, or kill 20 hostages, or slash the Mona Lisa. Then the rest of the the museum's \$12-millioo American wing. The money was to be payable over a five-year period ending to 1976. It could not be learned immedi- organized, so the networks don't

Popeye Loses to the U.S. Violence Code

By Joseph P. Mastrangelo

WASHINGTON (WP) — Popeye, the salty, dockside, rough, tough pugilist with a heart of gold, this year is celebrating his 50th anniversary of settling arguments.

The comic-strip character first appeared on Feb. 17, 1919, as a minor character in a comic strip called "Thimble Theater," created by the late E.C. Segar. King Features announced recently that it has licensed animation rights to "Popeye" to Hanna-Barbera Productions, which will pro-

duce at least 16 new half-hour programs for CBS, as well as an hourling animated, prime-time Christmas special this year. Also to help add to the popularity of the one-eyed lovable ruffian. King Features has licensed Paramount Pictures to do a movie with actors. Cartoonist-writer Jules Feiffer is at work on the script. Dustin Hoffman has discussed playing Popeye but has yet to sign a contract, according to some close to the project. "It should be a lot of fun." said Ted Hannah of King, "I heard they are trying to get Lily Tomlin to play Olive Oyl."

Elzie Crisler Segar, the cartoonist who would never tell anyone his first or middle name while he was alive, was born in 1894 in Chester, Ill. Segar learned cartooning by taking the once-famous Evans correspondence course.

First Job

The first cartoon job Segar landed was on the old Chicago Herald drawing "Charlie Chaplin's Comie Capers." The Chicago Herald ceased publishing and Segar moved to the Evening American, where his talent was spotted by Arthur Brisbane, a top Hearst lieutenant, who was editor of the syndicate that later became King Features.

Brisbane brought Segar to New York and put him to work oo a strip called "5.05," a comedy about suburban commuters. One of his leading characters had the same shape that eventually became the

hamhurger-eating Wimpy.

Segar was a fishing enthusiast and almost every afternoon when the strip was finished he and a couple of cartoonists would go over to the East River docks and fish. When word got back in the editors about this "goldbricking," he was called on the carpet and told to use his time for another strip, and "Thimhle Theater" was born.

lo 1928, nine years after the strip began, Segar had the Oyls, Olive and her hrother Castor, along with her boyfriend Ham Gravy prepar-ing for a trip to Dice Island with their magic hen, Bernice. They had

ing for a trip to Dice Island with their magie hen, Bernice. They had a hig yaeht and needed a sailor to help out. Walking the docks. Castor spotted an odd-looking tar and asked. "Hey there, are you a sailor?" "Ja think I'm a cowboy?" the sailor answered. And Castor turned heel saying, "Okay. You're hired."

Popeye in those days wasn't the man he is today. As a matter of fact, he was a coward. A couple of weeks after he sailed with the Oyls, Castor Oyl chased Popeye up a mast.

Suddenly Popeye struck his first punch with one of those hig hammy arms, knocking Castor into a rolling ball across the deck. It was during a period of hig fights and fighters, of Dempsey and Tunney; the country was hoxing conscinus. As soon as Segar drew the first punch he realized he had the making of a great fighter and the strip's name became "Thimble Theater — Starring Popeye."

Around 1932

Around 1932 it became just "Popeye." Popeye was the forerunner of "Superman." The scrappy sailor dived nut of planes and landed on his lantern jaw. Bullets never stopped him, he knocked out gorillas and fought anyone anywhere.

Fan mail was immediate. Some complained about the character "Alice the Goon," mostly mothers writing in to say their children were having nightmares.

His influence on spinach consumption was legendary.
Segar was 44 years old when he died in 1938, hut his strip was already a big success, appearing to hundreds of newspapers and with a popular radio versioo, Bud Sagendorf, who draws Popeye today.

was still a high school student when he met Segar in 1931. Except for a period when the strip was drawn by Bill Zaboly, Sagendorf has

been at the drawing hoard each day turning out Popeye.

Although Popeye's strength and fists have overcome man, beast and the elements through the years, he will be no match for the video-violence code in his new series.

"It's not going to be that way anymore," said Art Scott, an executive with Hanna-Barbera, "the characters will look and sound the same as they did in 454 previous cartoons, but Popeye will not be punching anymore."

He prinnised viewers that the runty puncher-outer is not being fitted into the corporate image and that his new spinach-eating energy will be directed against nunmoving nhjects such as a huge boul-der, a truck, a house and, in one incident, a moving mosquito. Bluto, his ancient rival for the hand of slinky Olive Oyl, whose

virtue Popeye always defended, will still be around with his dirty tricks, hui Popeye is going to rise above it all.

"The sting and zip will not be taken out of Popeye." Scott said.

"The 'SPLATS, WHAMS, POWS AND WHOMPS' will disappear. Bluto will still he the pest when he does things like change a street

ign, trying to divert Popeye." In 1932, Max Fleisher was the first to put the strip in animated form. The vnice of Popeye for the past 44 years has been Jack Mercer. Mercer, a quiet, easy-going New Yorker, would be more at home with Wimpy. a voice he also provided in the old TV and movie

Although he has lived his double life for most of his years, Mercer

was not the original voice. That belonged to a country singer named Red Pepper Sam Costello, who dropped his contract in 1933.

It was in the early '30s, when Mercer was employed by Fleisher, that he first developed Popeye's voice. "I began mimieking Popeye when I was inking in the panels just in clown around and amuse the waster." Mercer recalled. nther artists." Mercer recalled. "When Costello quit, the producers asked me to go to work for

"The difficulty is cutting down the violence." Mercer said. "Popeye never did burt anyone unless it was absolutely necessary. But the silly part of it is, that violent shows are still being seen on TV all over the country and nobody objects. It doesn't make sense to impose different rules on the new shows."

Schmidt Eulogized PEOPLE: A 'Canceled' Envoy

Someone else might have been perplexed, but Yochanan Meroz, Israeli ambassador to West Germany, was reported to be "very pleased" with a eulogy to him de-livered hy Chancellor Helmut Schmidt, who was under the impression that he was dead. The premature eulogy came about like this: Meroz was supposed to have met last week with Klaus Boelling, the West German government spokesman, but canceled the meeting. Boelling was passed a note saying that Mercz was "getotet," which lit-crally means "killed" but is also a German slang term for "canceled." Boelling, believing Meroz to be dead, passed the word to Schmidt, who delivered a warm eulogy

In French Polynesia, Princess Caroline of Mooaco said that it's "nugh" if the world thinks her wedding to Philippe Junot was too small. She also said that she wants to have at least four children. "I was getting married for myself. I was not getting married for the public," she told reporters. "I didn't want my wedding to be a three-ring circus. It's my own per-sonal affair. I don't care what the world says. It was for me and it was a beautiful wedding because I had the people I love and wanted in be there. The press is upset, but that's tough." Caroline and Junot were married in relatively small, private civil and religious ceremonies at the palace in Monaco last month, to the consternation of some of the press and public. Junot said that they will be moving into a new apartment in Paris. Asked if they plan to have children, Junot, 38, said. "Absolutely," and Caroline, 21, said, "Oh yes," adding she wanted to have a large family. "It starts from four," she said. The couple have been honeymooning in French Polynesia since July 9. Junot said that they expect to re-main there another 10 days to two weeks. Both said they are looking forward to seeing some of the traditional Bastille Day festivities which begin July 14. They met the press at the home of French doctor Christian Jonville on the island of
